

brain and culture neurobiology pdf

Editor's note: In a complementary article, Dr. Mark J. Ashley discusses frontline rehabilitation methods that can improve brain injury recovery outcomes. Here, Marcela Pekna and Milos Pekny explain what happens within the brain after injury and how scientists' growing awareness of the brain's capacity for repair could lead to better treatment options.

The Neurobiology of Brain Injury - Dana Foundation

Neuroscience (or neurobiology) is the scientific study of the nervous system. It is a multidisciplinary branch of biology, that combines physiology, anatomy, molecular biology, developmental biology, cytology, mathematical modeling and psychology to understand the fundamental and emergent properties of neurons and neural circuits. The understanding of the biological basis of learning, memory ...

Human Brain - Neuroscience - Cognitive Science The Human Brain is the most Complex Processor of Information on the Planet. Our ability to Process Information and Store Information, , is what makes us Human. Information Defines us, Information Controls us, Information Teaches us. Know your Processor, understand the Software (), and understand the Hardware ().

Human Brain - Neuroscience - Cognitive Science

The cerebrum is the largest part of the human brain, and is divided into nearly symmetrical left and right hemispheres by a deep groove, the longitudinal fissure. The outer part of the cerebrum is the cerebral cortex, made up of grey matter arranged in layers. It is 2 to 4 millimetres (0.079 to 0.157 in) thick, and deeply folded to give a convoluted appearance.
