Chemical Reaction Stoichiometry (CRS): A Tutorial

The Department of Chemical Engineering and Biotechnology at Cambridge University is one of the UK's leading research departments, ranking highly in both national and international University league tables. The department's research strategy responds to the global drive for sustainability, addressing the need for novel chemical engineering and biotechnology processes and materials.

Chemical kinetics, also known as reaction kinetics, is the study of rates of chemical processes. Chemical kinetics includes investigations of how different experimental conditions can influence the speed of a chemical reaction and yield information about the reaction's mechanism and transition states, as well as the construction of mathematical models that can describe the characteristics of a ...

Chemical thermodynamics is the study of the interrelation of heat and work with chemical reactions or with physical changes of state within the confines of the laws of thermodynamics. Chemical thermodynamics involves not only laboratory measurements of various thermodynamic properties, but also the application of mathematical methods to the study of chemical questions and the spontaneity of ...
