Benjamin Pierce received a B.S. in Biology from Southern Methodist University and a Ph.D. from the University of Colorado. Ben is currently Professor of Biology and holder of the Lillian Nelson Pratt Chair at Southwestern University, Georgetown, TX. He is a population geneticist who conducts ecological and evolutionary research on amphibians.

Neo-Darwinism can rebut this line of criticism in two ways: 1) almost any gene will work â€” a "many-worlds" theory of biology, or; 2) there is an easily-found mutational pathway, as Manfred Eigen described in 1987 , leading from the first set of primitive genes to all of the genes subsequently used in biology. But, since 1987, Eigen's model has not been fleshed out.

Humanistic psychology is a psychological perspective that rose to prominence in the mid-20th century in answer to the limitations of Sigmund Freud's psychoanalytic theory and B. F. Skinner's behaviorism. With its roots running from Socrates through the Renaissance, this approach emphasizes individuals' inherent drive towards self-actualization, the process of realizing and expressing one's own ...

*Drosophila melanogaster* is a species of fly (the taxonomic order Diptera) in the family Drosophilidae. The species is known generally as the common fruit fly (though inaccurately) or vinegar fly. Starting with Charles W. Woodworth's proposal of the use of this species as a model organism, *D. melanogaster* continues to be widely used for biological research in genetics, physiology, microbial ...

In contrast to nucleic acids and proteins, the biosynthesis of glycans is not directly template-driven but, rather, is a result of a complex network of metabolic and enzymatic reactions that are influenced by many factors, including the genetic profile of the cells in which the glycoconjugates are expressed, epigenetics and the extracellular environment.

iForest is an Open Access, peer-reviewed online journal published by the Italian Society of Silviculture and Forest Ecology (SISEF). The journal encompasses a broad range of research aspects concerning forest science: forest ecology, biodiversity/genetics and ecophysiology, silviculture, forest inventory and planning, forest protection and monitoring, forest harvesting, landscape ecology ...
