System Center 2012 Configuration Manager Survival Guide

System Center Data Protection Manager (DPM) is a software product from Microsoft that provides near-continuous data protection and data recovery in a Microsoft Windows environment. It is part of the Microsoft System Center family of products and is Microsoft's first entry into the near-continuous backup and data recovery. It uses Shadow Copy technology for continuous backups.

System Center Data Protection Manager - Wikipedia

System Center Operations Manager (SCOM) is a cross-platform data center monitoring system for operating systems and hypervisors. It uses a single interface that shows state, health and performance information of computer systems. It also provides alerts generated according to some availability, performance, configuration or security situation being identified.
