Quality function deployment (QFD) is a method developed in Japan beginning in 1966 to help transform the voice of the customer into engineering characteristics for a product. Yoji Akao, the original developer, described QFD as a "method to transform qualitative user demands into quantitative parameters, to deploy the functions forming quality, and to deploy methods for achieving the design ...

In computer science, artificial intelligence (AI), sometimes called machine intelligence, is intelligence demonstrated by machines, in contrast to the natural intelligence displayed by humans and other animals. Computer science defines AI research as the study of "intelligent agents": any device that perceives its environment and takes actions that maximize its chance of successfully achieving ...

2.2. A deeper look into the algorithm and its meta-parameters. Particle swarm optimization, as many other

metaheuristic approaches, has several metaparameters that govern its behavior and efficiency in optimizing a given problem, specifically as the search behavior of particles, the influence of control parameters on the performances, and the convergence properties of the algorithm are concerned.

Problem Solving Problem Solving is the Capacity and the Ability to Evaluate Information and to Predict Future Outcomes. The Ability to Seek out Logical Solutions to Problems, Calmly and Systematically, without making things worse. Decision Making - Cause and Effect. "There are no Problems, only Solutions" Every Problem can be solved, you just have to learn how to solve it.
