### Microstrip Patch Antenna Design - Santa Clara University

In radio communication, an omnidirectional antenna is a class of antenna which radiates equal radio power in all directions perpendicular to an axis (azimuthal directions), with power varying with angle to the axis (elevation angle), declining to zero on the axis. When graphed in three dimensions (see graph) this radiation pattern is often described as doughnut-shaped.

### Omnidirectional antenna - Wikipedia

The Yagi-Uda antenna consists of a number of parallel thin rod elements in a line, usually half-wave long, typically supported on a perpendicular crossbar or "boom" along their centers. There is a single driven element driven in the center (consisting of two rods each connected to one side of the transmission line), and a variable number of parasitic elements, a single reflector on one side ...

Abstract. This article presents the design of K-band Substrate Integrated Waveguide (SIW) Band-pass filter with high rejection, by using the topology with iris and the SIW resonators.

### Design of K-Band Substrate Integrated Waveguide Band-Pass

High-frequency active-device performance depends very much on the dc biasing conditions. For optimum performance, a solid-state device (SSD) requires an application-specific biasing network. Such bias networks are not only essential parts of RF/microwave circuits with SSDs, but properly designed ...
