

modern public information technology pdf

modern technology comes at a high initial cost compared to basic health needs and other competing priorities. Demonstrating the cost-effectiveness of modern technology in promoting health is therefore a priority. Creative ways of investing and cost sharing should be discussed so that the information highway has health as one of its main applications.

Role of modern technology in public health: opportunities

Modern Public Information Technology Systems: Issues and Challenges examines the most important dimensions of managing information technology in the public sector.
