Node.js is an open-source, cross-platform JavaScript run-time environment that executes JavaScript code outside of a browser. JavaScript is used primarily for client-side scripting, in which scripts written in JavaScript are embedded in a webpage's HTML and run client-side by a JavaScript engine in the user's web browser. Node.js lets developers use JavaScript to write command line tools and ...

Node.js is a JavaScript runtime built on Chrome's V8 JavaScript engine. It lets you execute code in the browser or on the server. It is an open-source and cross-platform runtime environment for JavaScript code. Node.js uses an event-driven, non-blocking I/O model that lets it efficiently serve a large number of concurrent connections with a relatively small number of system threads. Node.js is designed to build scalable network applications. It is a great choice for building web servers, web applications, and other networked services.
