Directional drilling (or slant drilling) is the practice of drilling non-vertical wells. It can be broken down into four main groups: oilfield directional drilling, utility installation directional drilling (horizontal directional drilling), directional boring, and surface in seam (SIS), which horizontally intersects a vertical well target to extract coal bed methane

Cementing technology designed for the most challenging well environments Requirements for cementing units on offshore or onshore rigs vary depending on the working environment, and filling these requirements is critical to every successful cement job.

In geotechnical engineering, drilling fluid is used to aid the drilling of boreholes into the earth. Often used while drilling oil and natural gas wells and on exploration drilling rigs, drilling fluids are also used for much simpler boreholes, such as water wells. Various kinds of drilling muds, such as water-based drilling muds (WBs), oil-based drilling muds (OBs) and their formatives are ...
