

### **prolog programming for artificial pdf**

A fifth-generation programming language (5GL) is any programming language based on problem solving using constraints given to the program, rather than using an algorithm written by a programmer. [citation needed] Most constraint-based and logic programming languages and some other declarative languages are fifth-generation languages.

Thought-capable artificial beings appeared as storytelling devices in antiquity, and have been common in fiction, as in Mary Shelley's *Frankenstein* or Karel Čapek's *R.U.R.* (Rossum's Universal Robots). These characters and their fates raised many of the same issues now discussed in the ethics of artificial intelligence.. The study of mechanical or "formal" reasoning began with philosophers and ...

The clothing production process has been described in Fig. 5.1. It starts from the conceptualization phase, passes through design development, manufacturing, supply chain, and retailing till it reaches to the consumers (Nayak et al., 2015a). In the conceptualization stage a designer conceptualizes a theme based on the forecasting of trends in the color, fabrics, silhouette, and trims.
