

simulation modeling and analysis pdf

Systems Simulation: The Shortest Route to Applications. This site features information about discrete event system modeling and simulation. It includes discussions on descriptive simulation modeling, programming commands, techniques for sensitivity estimation, optimization and goal-seeking by simulation, and what-if analysis.

Modeling and Simulation in Python - Green Tea Press

A simulation is an approximate imitation of the operation of a process or system; the act of simulating first requires a model is developed. This model is a well-defined description of the simulated subject, and represents its key characteristics, such as its behaviour, functions and abstract or physical properties.

Monte Carlo methods are very important in computational physics, physical chemistry, and related applied fields, and have diverse applications from complicated quantum chromodynamics calculations to designing heat shields and aerodynamic forms as well as in modeling radiation transport for radiation dosimetry calculations. In statistical physics Monte Carlo molecular modeling is an alternative ...

DOE-2 is a widely used and accepted free ware building energy analysis program that can predict the energy use and cost for all types of buildings. DOE-2 uses a description of the building layout, constructions, operating schedules, conditioning systems (lighting, HVAC, etc.) and utility rates provided by the user, along with weather data, to perform an hourly simulation of the building and to ...

Article presenting Fritz Zwicky's General Morphological Analysis as a method for non-quantified modeling,

scenario development and strategy analysis.

General Morphological Analysis

Decision making under risk is presented in the context of decision analysis using different decision criteria for public and private decisions based on decision criteria, type, and quality of available information together with risk assessment.

Tools for Decision Analysis - ubalt.edu

Research: My research interests are in computer graphics, computer vision, parallel computing and human computer interaction. I have conducted a wide range of research on shape modeling/editing, texture mapping/synthesis, real-time rendering, GPU parallel computing, real-time face tracking, and 3D printing.
