**Software Cost Estimation, Benchmarking, and Risk**

He has led software cost estimation and software measurement improvement activities in software companies of different sizes and from various domains (e.g., in Germany, Japan, and India), and he has been involved in functional software size estimation (Function Points Analysis) and productivity benchmarking in organizations from both the industry and the public sector.

Software estimation is the process of predicting the effort, duration and cost required to develop a software system [2]. Estimators often rely on one or more rules-of-thumb to create
