

the art and science pdf

This text is an early draft for a general introductory textbook in computer science—a Java-based version of my 1995 textbook *The Art and Science of C*. My hope is that I can use much of the existing material in writing the new book, although quite a bit of the material and overall organization have to change.

The Art and Science of - Reed College

If nothing similar can be claimed for the arts, then an essentially dichotomous view must be taken of the arts and sciences, and this, of course, is a well-known position: Science deals with knowledge, art with emotions; science concerns truths, art concerns values; science establishes facts, art suggests perspectives.

Alfred H. Burne wrote, "War is an art rather than a science; it is waged between human beings, and involves the interplay of their respective characters. Science does not recognize sentient beings as such."6 Thus, the friction of war and the animate nature of the participants made war more an art than a science.
