Using Ghostscript with overprinting and spot colors. In general with PostScript and PDF interpreters, the handling of overprinting and spot colors depends upon the process color model of the output device.Devices that produce gray or RGB output have an additive process color model. Devices which produce CMYK output have a subtractive process color model. . Devices may, or may not, have support ...

A software bug is an error, flaw, failure or fault in a computer program or system that causes it to produce an incorrect or unexpected result, or to behave in unintended ways. The process of fixing bugs is termed "debugging" and often uses formal techniques or tools to pinpoint bugs, and since the 1950s, some computer systems have been designed to also deter, detect or auto-correct various ...
