Engineer's Mini-Notebook - Formulas, tables and Basic Circuits

In electronics, emitter-coupled logic (ECL) is a high-speed integrated circuit bipolar transistor logic family. ECL uses an overdriven differential amplifier with limited emitter current to avoid the delay caused by switching out of the saturated region of operation. As the current is steered between two legs of an emitter-coupled pair, ECL is sometimes called current-steering logic (CSL ...

Emitter-coupled logic - Wikipedia

The 555 timer IC is an integrated circuit (chip) used in a variety of timer, pulse generation, and oscillator applications. The 555 can be used to provide time delays, as an oscillator, and as a flip-flop element. Derivatives provide two or four timing circuits in one package. Introduced in 1972 by Signetics, the 555 is still in widespread use due to its low price, ease of use, and stability.

555 timer IC - Wikipedia

Simmer, Mrs. Nora Ann: The Winchester Sun Mon., 11-27-1950: Paas, Joe: Joe Paas, a blacksmith at Union, a little place near Morganfield, was indicted in two cases for forgery.

Clark County Obituaries: P

After yesterday's post about what determines temperature, I thought I would revisit one of the most convincing evidences of Earth's greenhouse effect.. As I've mentioned before, a handheld infrared thermometer is a great little tool to help gain physical insight into the thermal radiative (infrared) effect the atmosphere has on surface temperature.
