Disk Defragmenter is a utility in Microsoft Windows designed to increase access speed by rearranging files stored on a disk to occupy contiguous storage locations, a technique called defragmentation. Defragmenting a disk minimizes head travel, which reduces the time it takes to read files from and write files to the disk. Beginning with Windows XP, Disk Defragmenter also reduces system startup ...

here it says that Win32\_Product will not give all the information about the installed softwares. That means, it will not list all the softwares. The reason for this is, win32\_product queries the MSI database to get the list. But there will be many softwares which will not have a entry in it as they got installed from exe's.
